

Solar support installation steps introduction

WORKING PRINCIPLE

Overview

How do I install a solar panel?

Installing your solar panel is a straightforward process though calling in professional installers is recommended. Making sure these installers are accredited by MCS is highly important, so as to ensure a high standard of installation. A solar panel will be most effective if you have a south-facing roof.

How does a solar panel installation work?

Mounting the panels : The installers will begin by securing mounting brackets to your roof or the ground (if it's a ground-mounted system). The panels will then be securely attached to these mounts. - Electrical wiring : After the panels are mounted, the electrical wiring will be connected to the inverter and electrical panel in your home.

What is needed to install solar panels on UK homes?

Here's a quick guide to what's needed to install solar panels on UK homes: An installer should visit to determine if the property is suitable for solar panels. They will look at the size and orientation of the roof to decide the best location and angle for installing panels.

Do solar panels need to be wired before installation?

Without fastening them at first, the installers will place the solar panels onto the mounting system. Once the correct angle is achieved, the panels are fastened with bolts. Your solar panel will most likely be pre-wired before installation, meaning that the wiring process can be skipped.

What is included in a solar panel installation kit?

Solar panel installation kit: This kit often includes the necessary tools and accessories for a professional installation. Solar panels: These are the primary components that convert sunlight into electricity. Inverters: Inverters convert

the DC electricity produced by the solar panels into AC electricity.

Can a solar panel be installed on a south-facing roof?

A solar panel will be most effective if you have a south-facing roof. This will ensure maximum sunlight reaches the panel. You will also have to make sure that your roof can support a panel, and that it has a large enough area for panel installation. Under Permitted Development Rights, you won't require formal permission to install a solar panel.
