

# Solar support leaks

## Overview

---

Why does my roof leak after installing solar panels?

There are various reasons your roof could leak after installing solar panels. They mostly have to do with poor installation where mounting holes are not sealed properly, the top is incompatible with solar panels, or the roof is old and not designed for solar panels.

How do I protect my solar panels from leaking water?

These barriers help to direct water away from the roof penetrations, reducing the risk of leaks. Monitor for pests: Birds, rodents, and other pests can sometimes nest under solar panels, causing damage to your roof. Regularly inspect the area around your solar panels for signs of pest activity and take suitable action to remove them if necessary.

What happens if solar panels are not installed properly?

Issues such as leaks, broken tiles, and structural damage can occur if the panels are not installed properly. To avoid roof damage, working with experienced installers who understand the intricacies of solar panel installation is essential. They will know how to secure the panels without compromising the integrity of your roof.

What are the most common problems caused by substandard solar installation?

One of the most common problems caused by substandard installation of solar is a leaking roof, often due to improperly waterproofed penetrations. While this sounds like a mouthful, I've broken it down to five easy tips that every home owner should know before selecting your solar installation company. 1.).

Do solar panels void a roof warranty?

Solar panels do not inherently void a roof warranty. However, some warranties

may have specific clauses related to modifications or alterations to the roof. It is important to consult with the roofing manufacturer and installer to ensure that the warranty remains valid after solar panel installation. Are solar panels screwed into the roof?

.

Can solar panels damage a roof?

This can lead to rot or other water damage to your roof's support structure. **Weight Damage:** Solar panels add extra weight to your roof, which can be a problem if your roof is already damaged or weak. If your roof is not strong enough to support the weight of the panels, it could eventually collapse or cause other structural damage.
