

Solar system chalk art

Overview

How do you paint a planet with chalk?

Overlap at least one set of planets. Do not trace around the entire planet with chalk at first. (Only color hard on half of each planet in a crescent shape. The dark side may have a faint outline added later) Do not over-chalk or over-work the rubbing. (The paper can only hold so much chalk before it goes bald).

How do students design their own Solar System?

Students will design their own unique solar system using the element of art – values in this lesson that is out of this world! This project covers Common Core Standards for Science for grades 5-8 which can be found at the end of the lesson. 5th, 6th, 7th and 8th Grades – The examples shown were created by a 5th grade class.

How do you trace a planet with chalk?

Do not trace around the entire planet with chalk at first. (Only color hard on half of each planet in a crescent shape. The dark side may have a faint outline added later) Do not over-chalk or over-work the rubbing. (The paper can only hold so much chalk before it goes bald) Add white chalk along the curve facing your light source.

Can you use black chalk to make a shadow?

Once the chalk is on the paper it is almost impossible to achieve true blended black. Tell them. "Do not to use the black chalk unless necessary. The black paper creates the shadow once the chalk is rubbed into the shadow area." Here is what we are looking for in our Solar System Values Lesson.

What do students know about the Solar System?

e. Students know the appearance, general composition, relative position and size, and motion of objects in the solar system, including planets, planetary satellites, comets, and asteroids. Students will design their own unique solar

system using the element of art - values in this lesson that is out of this world!.

How do you make a scale model of a solar system?

Make a Solar System on a String (scale distance model) Tie colored beads onto a string to make a scale model of the distances between planets in the solar system. You can wear your model or even display it on a wall. Measure and cut a piece of string about 30 cm longer than the distance you calculated from the Sun to Neptune.

Solar system chalk art
