

Solar system experience

Overview

Who can see the Solar System in 3D?

Anyone with an internet-enabled device browser can explore the past, present, and future of the solar system in 3D with NASA's interactive Eyes on the Solar System. Click anywhere on the image to get a closer look at a 3D rendering of NASA's Cassini spacecraft flying by Saturn's moon Enceladus in 2015.

What is a simulated live view of the Solar System?

This simulated live view of the solar system allows you to explore the planets, their moons, asteroids, comets and the spacecraft interacting with them in 3D. You can also fast-forward or rewind time, and explore the solar system as it looked from 1950 to 2050, complete with past and future NASA missions.

What is a real-life Solar System tour?

Imagine the prospect of a real-life solar system tour. It's akin to a child's joy on their first trip to a theme park. A hands-on space exploration that goes beyond the textbooks, casting a mesmerizing spell on minds open to the wonders of the universe.

What is a live view of the Solar System?

Check out all of the missions transmitting data to Earth, live. This simulated live view of the solar system allows you to explore the planets, their moons, asteroids, comets and the spacecraft interacting with them in 3D.

What do you love most about the Solar System?

"The thing I love the most about our solar system is that it's an incredible natural laboratory," said Dr. Lori Glaze, director of NASA's Planetary Science Division. "We have so many different types of objects in the solar system, from planets and moons to asteroids and comets.

Does NASA have a 'eyes on the Solar System' visualization tool?

NASA's Eyes on the Solar System includes renderings of 126 NASA spacecraft, including Juno, seen here flying by Jupiter. The agency's newly upgraded "Eyes on the Solar System" visualization tool includes Artemis I's trajectory along with a host of other new features.

Solar system experience

Solar System Exploration

Learn about the planets in our solar system. The solar system has eight planets: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune. There are five officially recognized dwarf planets in our solar system: Ceres, Pluto, ...

[Solar System by pablomarcel](#)

Explore the beauty and wonder of our Solar System like never before with this incredible simulation, built using Unity. Get a unique perspective of the universe as you witness the planets positioned in random order, and the mesmerizing animations of Saturn's rings.
