

Solar system made out of styrofoam balls

Overview

Collect the materials needed to construct the planets. It is best to have.

Cut the string that the planets will hang from. You will need to cut these at different lengths so the planets hang at different levels.

Find objects to use to suspend the planets. You can find these items at the craft store along with your other materials. You will need a wooden dowel that is 1/4 inch in diameter.

Making a solar system mobile is a great activity for when you're learning about the solar system. All you need to build your mobile are some simple supplies and an assortment of craft paints.

How do you make a solar system model with Styrofoam balls?

To make a solar system model with Styrofoam balls, you will need to purchase Styrofoam balls in sizes that represent the planets in our solar system. The sun will be the largest ball, and Mercury will be the smallest. Once you have your balls, you will need to paint them to look like the planets.

How to make a solar system model with balls?

To make a solar system model with balls, you will need to purchase a Styrofoam ball for each planet, as well as a small ball for the sun. You will also need some thin wire or string. Once you have all of your materials, you will need to paint the Styrofoam balls to look like the planets. Once the paint is dry, you can start to assemble your model.

What can students do with Styrofoam balls?

There are many different solar system projects that students can do using styrofoam balls. For example, students can create a model of the solar system by painting the balls to represent the different planets and then attaching them to strings of different lengths to represent the different distances between the planets.

How to make a solar system with yarn balls?

Step 1: Get your planets and the sun ready with colorful DIY yarn balls in different sizes. Step 2: Hang your yarn ball sun from the center of a large piece of round cardboard. Then hang the rest of the planets in orbit around the sun. You can put lights inside the yarn balls to make your solar system more decorative.

How to make a solar system mobile?

Once you have gathered all the necessary materials and tools, you can start creating your solar system mobile. Begin by painting the Styrofoam balls in the colors of the planets. You can use a reference image of the solar system to ensure that you get the colors right. After the paint has dried, you can attach the eyehooks to the Styrofoam balls.

What can be made out of a styrofoam ball?

There are many things that can be made out of a Styrofoam ball. For example, a person could make a sculpture or a model of something. A Styrofoam ball can also be used as a decoration for a room or as a stress ball.
