

Solarus solar energy

Overview

What is Solarus Solar System?

Solarus provides rooftop solar system for home. We envision a future, where renewable energy is an affordable and sustainable solution which creates an uninterrupted supply of alternative energy to contribute towards building a green planet.

Who is Solarus?

It provides solar power to residential and commercial complexes and businesses in urban cities and rural towns across Maharashtra, with a stronghold in over 100 locations. With 2+ years of experience and expertise in the solar PV industry, Solarus is a specialist in the design, execution, installation and maintenance of solar-powered systems.

How does Solarus work?

Solarus designs one-stop integrated hot water and energy solutions that are customized to match your energy demand profile. Solarus solutions collect up to 4 times more total energy from the same (roof) area, over any PV installation.

Why should you choose Solarus?

Solarus helps these businesses towards a zero-energy bill for hot water with the latest and most innovative solar technologies that guarantee high yield, effectiveness and sustainability. Here are a few figures: As an innovative renewable energy company, we develop and market the most innovative hybrid solar solution.

What is Solarus hot water?

The hot water solution provided by Solarus is a game-changer for businesses across all industries, offering a unique and sustainable solution that can significantly reduce energy costs and improve efficiency. Everything you want

to know about the most cost effective hot water solution.

What is Solarius?

Solarius is a professional Solar PV calculator software for designing photovoltaic systems that is already in use by thousands of experts. For exact financial and technical feasibility assessments, the full, dependable, and novel tool for grid-connected PV system design combined with a wide range of energy storage system types.

Solarus solar energy

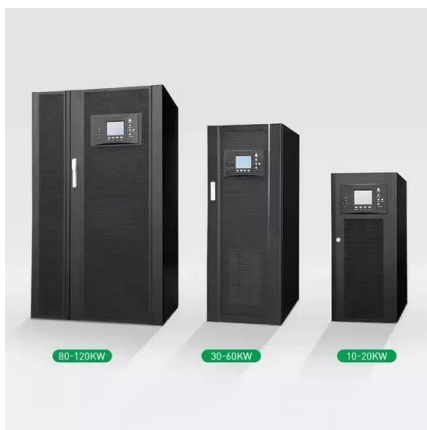

Solar Water Heater

Working principle: When sun rays strike the collector glass cover, three things happen. The cover observes a small portion of the energy, the sun is Overall dimensions 2132 x 1045 x 95mm Effective absorbed area TWO +/-0.1 M SQ. Glazing material and thickness
