

Solo power

Overview

SoloPower Systems Inc. technology is used to create ultra-lightweight, flexible, based on CIGS (. Originally developed by , California-based Solopower Inc., the technology is now owned by Solopower Systems Inc., a solar panel development & manufacturing company based in , Oregon. SoloPower technology features an electroplating process that utilizes nearly 100% of its materials to manufa.

Who is SoloPower?

SoloPower is an innovator of thin-film photovoltaic (PV) cells and modules. The SoloPower mission is to mass-produce PV modules for ubiquitous applications on a global scale at a cost that is 1) lower than the traditional wafer-based solar technologies, and 2) at parity with that of conventional power grid.

What happened to SoloPower?

SoloPower was announced a winner of the 2012 TiE50 award in the category of Clean Energy. The company closed its doors in late 2017 [citation needed] and is no longer operational. The Norwegian firms Convexa Capital, Spencer Energy and Scatec have invested approximately \$30 Million into SoloPower in 2007.

What is SoloPower & how does it work?

San Jose-based SoloPower offers a combination of technical prowess and strong financial backing through funding partners Convexa Capital, Crosslink Capital, and Firsthand Funds. SoloPower's goal is to mass produce low-cost, high-efficiency PV modules and offer a viable alternative to electricity produced using traditional fossil fuels.

What is SoloPower CIGS technology?

SoloPower technology features an electroplating process that utilizes nearly 100% of its materials to manufacture its CIGS cells. SoloPower technology was created by SoloPower Inc., founded by Bulent Basol and Hodayoun Talieh in 2005, which began a pilot manufacturing line for SoloPower solar panels in December of that same year.

Why should you choose SoloPower?

Our lightweight, flexible and powerful solar technology provides the design versatility that makes integration with a variety of applications simple — thus offering a powerful and aesthetic solution to meet the challenges of growing markets. © 2020 SoloPower Systems, Inc. All Rights Reserved.

What is solos power?

SoloS Power is creating a sustainable future by accelerating the UK's transition to reliance on a zero carbon electricity supply. We develop and operate Grid Scale Battery Energy Storage Systems, which are essential to enable unpredictable renewable energy to become the core component of the UK's energy supply in the future.

Solo power

Solo

All-In-One Solar Growth Platform Grow smarter with Solo We are mission control for your most crucial solar growth operations. Our accurate proposals, advanced workflows, and ever-expanding integrations help you rocket past the competition.

[SoloPower® SoloPanel® SP3S](#), [SoloPower®](#)

SP3S SoloPanel ® SP3S is our second-generation, large-format flexible module engineered for commercial and industrial building applications. Employing our proprietary electrochemical process, Copper Indium Gallium di Selenide (CIGS) semiconductor material is

Welcome To SOLOPOWER

SoloPower is a technology leader in the field of thin film photovoltaics (PV) for low-cost module manufacturing and delivery of solar electricity for a variety of uses including grid-connected ...

Projects

PROJECTS Since certifying the world's first flexible CIGS photovoltaic module, SoloPower Systems has focused on seeding the market with our products for testing and customer validation. To date, we have proudly completed SoloPower installations in 20 countries

SP1

SP1 SoloPanel ® SP1 is our second-generation, flexible photovoltaic module optimized for sixteen-inch standing-seam metal roof integration. The SP1 module is easily configured for multiple adhesive applications, enabling rapid installation and low-cost system

Leadership

Prior to joining Solopower Systems, Bryan held executive positions at SVTC Solar, VentureTech Alliance (venture capital affiliate of TSMC), GetThere, Inc. and Price Waterhouse. Brian brings international, VC and public company experience combined with in-depth knowledge regarding solar and semiconductor manufacturing.

Welcome To SOLOPOWER

SoloPower is a technology leader in the field of thin film photovoltaics (PV) for low-cost module manufacturing and delivery of solar electricity for a variety of uses including grid-connected commercial, residential and distributed power applications. San Jose-based

FAQs

SoloPower Systems is the only CIGS manufacturing company that uses electrochemical deposition for each of the CIGS layers. Based on over 100 years of reliable industrial electroplating technology, our proven and proprietary process provides high throughput, consistent control, high yield, high material utilization and low capital equipment costs.

SoloPower

SoloPower SP3 A flexible thin-film photovoltaic module similar to the SP1, designed for large-scale rooftops, offering ease of installation and compatibility with various substrates. SoloBucket A portable power kit containing a flexible solar panel, battery solutions

Power sprayers for professional users:

The output of the SOLO power sprayer is supplied by a reliable, compact, efficient and very quiet Honda 4-stroke engine. It has special bearings to protect against vibration and is easy to start and low-maintenance. The adjustable operating ...

TECHNOLOGY

SoloPower Systems leads the way with a line of thin-film CIGS lightweight photovoltaic (LPV) solar cells that adapt to virtually limitless site-specific applications. THINNER IS BETTER Thin-film solar cells utilize only a 1-4 µm-thick layer of semiconducting material to produce electricity, thus requiring less processing and fewer materials.
