

Soroti solar power plant

Overview

The Soroti Power Station is a 10 MW (13,000 hp) solar power plant in Uganda. It was the largest grid-connected, "privately-funded solar power plant at opuyo, soroti district in uganda, outside of South Africa" at its commissioning and until the Pilot Solar Power Plant (20MW) of The Xsabo Group in Kabulasoke (Kabulasoke).

The power station is located in , southeast of the city of in the of Uganda, approximately 282 kilometres (175 mi) by road north-east of , the country's capital and largest city.

The power station was developed by a of Access Power Limited (through its subsidiary Access Uganda Solar), a company based in the United Arab Emirates(Sunztech).

• • • .

The power station has a 10 megawatt capacity. Its output is sold directly to the for integration into the national grid. The power is evacuated via a substation near the station. It has been estimated that the energy.

The construction costs were US\$19 million. The project received partial funding from the through . On 12 December 2016, the solar plant was.

• • • •

What is Soroti solar power plant?

The Soroti solar power plant is the first grid-connected solar plant in Uganda and, at the time of its commissioning in December 2016, it was the largest solar power plant in East Africa.

How much electricity does a solar plant produce in Soroti?

Therefore, if each household, on average consumed this amount of electricity per month, the electricity generated by the solar plant can supply electricity to over 34 880 domestics electricity consumption. This is equivalent to about 63.5% of households in Soroti, which was 54 921 based on the 2014 national

census ([49], page 20). Fig. 6.

Is Soroti solar power plant economically viable?

For an economically viable utility-scale grid connected solar PV system, a payback period between 8 and 18 years is recommended by Ref. Therefore, at this tariff rate, it can be concluded that Soroti solar power plant is economically viable.

What is the performance of Soroti solar PV plant?

Overall, the performance of the Soroti solar PV plant is comparable with installations within African countries and tropical countries. The annual specific yield of 1670.2 kWh/kW and performance ratio of 75.84%, are respectively within reported ranges of 1419.1 kWh/kW and 1788.5 kWh/kW, and 67.9% and 84.0%. 3.2. Economic performance indicators i.

What are the economic indicators for Soroti solar power plant?

Table 6. Summary of the estimated economic indicators for the Soroti solar power plant. When a tariff of US\$0.1637/kWh is used, which is the amount receivable by the project owner, the simple payback period and discounted payback period are estimated as 8.20 years and 9.28 years, respectively.

How many people live in Soroti?

This is equivalent to about 63.5% of households in Soroti, which was 54 921 based on the 2014 national census ([49], page 20). Fig. 6. Quarterly energy production by Access Solar plant. Fig. 7 presents the daily quarterly and annual mean final energy yield for the solar power plant.

Soroti solar power plant

news

Minister Irene Muloni, together with representatives of Access Power, EREN RE and donors celebrated today the inauguration of the solar power plant in Soroti, Uganda. Made up of 32,680 photovoltaic panels, the new 10 megawatt facility is the country's first grid-connected solar plant and will generate clean, low-carbon, sustainable electricity to 40,000 homes, schools and ...

East Africa's largest solar plant begins operation in Uganda

Made up of 32,680 photovoltaic panels, the new 10MW facility is Uganda's first grid-connected solar plant and East Africa's largest and will generate clean, low-carbon, ...

Local leaders question the significance of Soroti solar plant

Soroti, Uganda , THE INDEPENDENT , Local leaders in Soroti have raised concern over the capacity and significance of Soroti Solar Plant to the region. Soroti Solar Plant was switched on in December 12th, 2016. The plant was built at US\$19 Million approximately UGX 68 Billion to supplement hydro power supply in the region. The Solar ...
