## Overview

---

Substrates of ITO on glass were cleaned by successive ultrasonication in.

To obtain the spatial variation of the work function for each perovskite sample, we performed KPFM, which is an AFM-based technique to acquire work function information of th.

The STEM images and EDX maps were taken using a JEOL 2800 S/TEM equipped with dual 100-mm<sup>2</sup>silicon drift detectors at 200 kV with a probe size of 1 nm. To perform the STE.

All bulk and slab first-principles calculations were performed using density functional theory (DFT) in the plane-wave/pseudopotential approach implemented in t.

p-Toluenesulfonic acid monohydrate was first dehydrated to remove the water of crystallization. Using 100 ml toluene dissolves 1 g p-toluenesulfonic acid monohydrate in.

**Product Model**  
HJ-ESS-215A(100KW/215KWH)  
HJ-ESS-115A(50KW/115KWH)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

### Mechanically durable chiral-structured heterointerfaces

While interface engineering of perovskite solar cells (PSCs) for defect passivation and band alignment optimization has contributed to recent breakthroughs in the efficiency and stability of PSCs, consideration of the mechanical reliability of the heterointerface has been relatively overlooked. Published in Science, the study by Duan et al. proposes that ...

### Mitigating the Heterointerface Driven Instability in Perovskite

Metal halide perovskites have the potential to revolutionize the field of photovoltaics, though limited stability has impeded commercial exploitation. The soft heterointerface between the perovskite and charge-transporting layer is one of the major bottlenecks that limits operational stability. Here, we present rationally designed molecular ...

### Stability-limiting heterointerfaces of perovskite photovoltaics

Optoelectronic devices consist of heterointerfaces formed between dissimilar semiconducting materials. The relative energy-level alignment between contacting semiconductors determinately affects the heterointerface charge injection and extraction dynamics. For perovskite solar cells (PSCs), the heterointerface between the top perovskite surface and a charge-transporting ...

### Heterointerface engineering of perovskite defects and energetics ...

Perovskite light-emitting diodes (PeLEDs) rely on optimized device architecture to realize effective electro-optical converting. Especially, the stacks of dissimilar semiconducting materials form heterointerfaces, at which the defects and energetics of perovskite film greatly affect the device performance. Herein, we focus on the heterointerface engineering of ...
