When was the State Grid Corporation of China founded?

The State Grid Corporation of China was founded on December 29, 2002, when the restructuring divided the former State Power Corporation of China into two grid companies, five generation groups and four accessorial business companies.

Does China have a state grid?

State Grid runs the power system in all but five of China's 31 provinces and regions, connecting the renewable-rich western areas of Qinghai and Inner Mongolia with the power-hungry cities nearer the coast.

Who owns State Grid?

As of March 2024, State Grid is the world's third largest company overall by revenue, behind Walmart and Amazon. In 2023 it was reported as having 1.3

million employees, 1.1 billion customers and revenue equivalent to US\$546 billion. It is overseen by the State-owned Assets Supervision and Administration Commission of the State Council.

Will China's biggest grid company create a power trading forum?

This article is for subscribers only. China's biggest grid company will create a forum that'll allow for widespread power trading across provinces, part of the government's efforts to smooth out supply and enhance the availability of clean energy.

Will state Grid help China achieve carbon targets?

State Grid is seeking to build "a new power system dominated by new energy" that can help China achieve its carbon targets, the government-owned company said in a statement. It didn't give a start date.

What will state grid do in 2025?

State Grid said earlier that the company will continuously focus on core and key technologies and invest more than 80 billion yuan (\$12.4 billion) by 2025 on technology research and development to promote the safe and steady operation of the country's power industry and supply chain.
