

Subsidy for ground installation of photovoltaic panels

Overview

Are UK government grants available to reduce solar panel costs?

A detailed look at UK government grants available to reduce solar panel costs. Solar panels are becoming an increasingly common option for UK households, giving people the option to produce their own green energy. One issue that many people face, however, is the price of solar panels and organising installation.

What if I don't qualify for a solar panel grant?

If you don't qualify for any solar panel grants, there's another way to start benefiting from solar electricity with no upfront cost. Sunsave Plus, the UK's first solar subscription, will provide you with best-in-class kit, all in one easy solar & battery package that comes with a 20-year Sunsave Guarantee.

Should you apply for a solar panel grant?

By applying for a solar panel grant, you could receive heavily discounted or even free solar panels, resulting in annual energy bill savings upwards of £1,040. We recently conducted a survey of over 1,540 Independent readers who own solar panels* to understand how they made the most of the solar panel funding available to them.

Can you get a solar energy grant in 2023?

The grant opened in April 2023 and will run until March 2025. It can be used to fund home improvements, such as insulation, heat pumps, double glazing, solar thermal, and solar PV panels. As of February 2024, 28% of the grants handed out have been for solar panels, so applying for the grant is worth a shot if you're eligible.

Are there government grants for solar panels?

There are currently three government grants available to help with the upfront costs of solar panel installation: ECO4: Funding for energy-efficient retrofits to

fuel-poor households, or ones with occupants on certain benefits. Each grant has different eligibility criteria, as well as the benefits they provide.

Are there government grants for solar panel users in Europe?

There are a number of government grants for solar panel users across Europe, which proves the growing importance of solar energy and how governments are trying to encourage people to make the most of solar energy.
