

Successful bid price of domestic energy storage project in Brazil 2026

Overview

What is the market potential for energy storage in Brazil?

Daniel Lyrio: TBEA considers that Brazil's market potential is estimated at 5 GWh for the next three years, considering that we have the auction in 2025, with an average market [battery project] value of BRL 1.5 million/kWh, the number to be invested is around BRL 7.5 billion. Which applications should lead the adoption of energy storage in Brazil?

.

How much money will Brazil spend on construction projects in 2023?

In 2023 alone, Brazil contracted R\$37.5 billion in projects through two auctions. For future projects, EPE has pointed to works to be authorized in auctions expected to result in R\$32 billion in investments by 2026 for the construction of 9,000 kilometers, in addition to substations.

Is Brazil a good place to invest in the energy transition?

Brazil is one of the most attractive markets to invest in the energy transition, given the quality of its energy resources, and also thanks to its regulatory stability and legal security," Mr. Silveira said. The financial viability of projects brings uncertainties, as it is a capital-intensive industry.

Can TBEA replicate the energy storage model in Brazil?

TBEA will bring case studies from large energy storage projects installed by the company around the world, showing the potential to replicate the model in Brazil. pv magazine will also look at the variables that can make these projects more, or less competitive. Register now! From pv magazine Brasil.

Can foreigners invest in battery storage businesses in Brazil?

Investment, incentives and taxation scenarios According to Brazilian law, there are no legal restrictions on direct foreign investment in the battery

storage businesses or in the power sector (except in very specific segments or sectors of the economy).

How much energy is invested in renewable sources in Brazil?

The amount corresponds to investment in large generation plants, of which 34% are related to renewable sources, such as wind and solar, currently the drivers of the Brazilian electricity sector growth.
