PVTIME - Against the backdrop of widespread power cuts in Spain in April 2025, which highlighted the importance of energy storage, the country's largest hybrid renewable energy project, Gecama, secured approximately €300 million in funding. Developed by Enlight, the project will combine wind, solar.

The government of Spain is launching €160 million (US\$170 million) in grants for energy storage projects, aiming to fund 600MW of projects to go online in 2026. The Ministry for the Ecological Transition and the Demographic Challenge (MITECO) opened a public consultation into the grant scheme.

Equitix lands €271 million from Banco Santander to power hybrid renewable projects in Spain, merging wind, solar, and battery storage for a sustainable energy future. UK infrastructure investor Equitix has secured EUR 271 million (USD 288.1 million) from Banco Santander to finance a portfolio of.

European renewables developer Q Energy has achieved debt financial close on a portfolio of seven solar farms under construction in Spain with a combined capacity of 251.71 MWp, which the company plans to hybridise with battery energy storage systems.
