

Successful bid price of mobile ESS unit project in Malaysia 2026

Overview

Why is Malaysia launching a Bess project?

The inaugural development of public BESS project in Malaysia is part of the Government's efforts to support the energy transition and achieve the goals of increasing the country's installed renewable energy capacity to 70% and to achieve net-zero by 2050.

How will Bess development impact Malaysia?

BESS development is expected to create new economic opportunities with an estimated investment value of RM2.8 billion. Petra expressed confidence that the initiative will strengthen the resilience and flexibility of Peninsular Malaysia's grid system, enabling it to accommodate greater capacity for renewable energy (RE) in electricity supply.

How will Lss6 & Bess work in 2026?

Petra said LSS6 and BESS are expected to further increase the capacity of renewable energy in the national electricity supply system and supply grid, respectively. Both the LSS6 and BESS programmes are scheduled to be operational in 2026, according to EC.

What is the capacity of EC's Bess project?

The total capacity to be acquired is 400MW/1,600MWh. In this regard, EC invites companies or consortiums that are experienced in implementing projects related to energy generation, and have the technical and financial capabilities to develop, finance, and operate energy storage systems to participate in the BESS project. RFQ Documents.

How many MW is a Bess project?

Petra said the inaugural development of BESS will offer a capacity totalling 400 megawatts (MW) and 1,600 megawatt-hours (MWh). The ministry explained that the BESS development will be divided into four separate

projects, each with a capacity of 100MW/400MWh, and is expected to achieve commercial operation dates starting in 2026.
