

Successful bid price of modular ESS container project in Greece 2026

Overview

The weight average winning bid in this round was €46,680/MW/year. Research firm LCP Delta wrote a deep-dive into the dynamics which would play out in the second round for Energy-Storage.news in September.

The weight average winning bid in this round was €46,680/MW/year. Research firm LCP Delta wrote a deep-dive into the dynamics which would play out in the second round for Energy-Storage.news in September.

The successful participants in the second round of Greece's auction for financial support of large-scale BESS have been revealed. The Regulatory Authority for Energy (RAE) of Greece revealed the shortlist of successful bidders in the second round of its auction for energy storage, totalling.

The average subsidy price in the third auction exercise came at €52589.16/MW/year. The lowest successful bid stood at €43927/MW/year, concerning a 25 MW/100 MWh project in the Western Macedonia region. The highest awarded subsidy came at €58773/MW/year and refers to a 7.9 MW/31.6 MWh project.

While 12 projects won awards in the first tranche of Greece's recent grid-scale energy storage auctions, what of the c.500 totalling nearly 27GW that didn't?

Jon Ferris, LCP Delta's Head of Flexibility and Storage, looks at the dynamics which could play out in rounds two and three in Europe's.

The bids were priced at between EUR 34,000 (USD 37,475) per MW and EUR 64,000 per MW and were capped at EUR 115,000 per MW per year. The lowest offer was launched by Helleniq Energy, while Intra Energy placed the highest bid. The selected developers will receive a grant of up to EUR 200,000 per MW.

The JMD sets the number, and outlines the general aspects of, the auction processes to be conducted; determines the technical and licensing requirements that Energy Storage System ("ESS") projects must fulfill in order to participate; sets the time limit for the beginning of the operation of.

Greece has launched its third and final tender under a 1-GW program to support standalone battery energy storage systems (BESS), aiming to allocate 200 MW of capacity with available subsidies of EUR 200,000 (USD 217,920) per MWh. This move, approved by Greece's Regulatory Authority for Energy.
