

Swell solar solutions

Overview

What is Swell Energy?

Swell Energy is building a greater grid for the greater good. Take control of your energy with solar, energy storage, and our virtual power plant (VPP) programs.

How much solar energy will Swell generate in 20 years?

Over the next twenty years, distributed energy systems in Swell's current VPP portfolio are expected to generate over 3,000 GWh of clean solar energy, with customers potentially storing 1,000 GWh for later use, and dispatching over 200 GWh of this stored solar energy during events when the utility calls on the VPP for capacity.

Why did Swell Energy raise \$120 million?

Swell Energy announced that it has raised \$120 million to further its popular virtual power plant (VPP) programs. (Photo: Business Wire) Swell Energy announced that it has raised \$120 million to further its popular virtual power plant (VPP) programs. (Photo: Business Wire).

How many virtual power plants will Swell Energy build?

LOS ANGELES-- (BUSINESS WIRE)--Distributed energy and grid solutions provider Swell Energy (Swell) today announced plans to finance the construction of four virtual power plants (VPPs) representing over 200 MWh of distributed energy storage paired with 100 MW of solar PV capacity.

Does Swell offer a home energy subscription agreement?

In conjunction with the closing of its first VPP Financing Vehicle, Swell also announced the launch of its Home Energy Subscription Agreement, which allows homeowners to finance their home energy systems through Swell, while generating, storing, and consuming their home's energy in an optimized and transactive manner.

How does swell's VPP program work?

Swell's VPP programs help reduce the use of fossil fuel peaker plants by utilities and provide other important grid services by integrating solar, energy storage, and electric vehicle charging with the utility to provide a more reliable and carbon-neutral grid.
