

System power 9 600w review

Overview

The L9-CM-600W is 80 PLUS Silver-rated; we don't review many power supplies with the Silver certification, but we know it's a step up from Bronze, particularly for folks on a budget. Yo.

There are two +12V rails, the first delivering 4A more than the second one. In total, both +12V rails can output 576W, or 96 percent of the unit's maximum. The minor rails also have unequal pe.

Cable length is ample, as is the distance between connectors. Usually we complain when there's more than 10-11cm between the SATA connectors. However, lately we've noticed ca.

Since there are only two +12V rails, some compromises were made. But we don't agree with putting one EPS connector and two PCIe connectors together on the second +12V rail.

be quiet! is a well-known German company with a diverse portfolio of PSU products. As you might guess from its name, be quiet!'s focus is on delivering acoustically-friendly power supplies, and indeed the company's PSUs are some of the quietest you can buy. During this year's CES, we had the chance to check out.

The L9-CM-600W is 80 PLUS Silver-rated; we don't review many power supplies with the Silver certification, but we know it's a step up from Bronze, particularly for folks on a budget. You also get the benefit of semi-modular cabling, compatibility with the C6 and C7 sleep states.

There are two +12V rails, the first delivering 4A more than the second one. In total, both +12V rails can output 576W, or 96 percent of the unit's maximum. The minor rails also have unequal peak power ratings, as the 3.3V rail delivers more amps than the 5V rail. It.

Cable length is ample, as is the distance between connectors. Usually we complain when there's more than 10-11cm between the SATA connectors.

Since there are only two +12V rails, some compromises were made. But we don't agree with putting one EPS connector and two PCIe connectors.

System power 9 600w review

BE QUIET! System Power 9 600W Bronze : r/buildapc

I'm looking for a PSU for some time and i found this, and was wondering if this PSU will be good and safe to buy. The one I found was BE QUIET! System Power 9 600W Bronze. My main question is: **Will it work with my build and wont fry any other
