## Overview

---

Tesla Energy Operations, Inc. is the division of that develops, manufactures, sells and installs , products and other related products and services to residential, commercial and industrial customers. The division was founded on April 30, 2015, when Tesla CEO annou.

What does Tesla Energy do?

Tesla subsidiary Tesla Energy develops, builds, sells and installs solar energy generation systems and battery energy storage products (as well as related products and services) to residential, commercial and industrial customers.

What can Tesla do for You?

At Tesla, we imagine a world where you can power everything with renewable energy. Our team is dedicated to solving problems that will have the most meaningful impact on emissions. We design and manufacture a fully integrated ecosystem for energy and transportation. Our products work together to maximize their impact.

What is Tesla Energy Operations?

Tesla Energy Operations, Inc. is the clean energy division of Tesla, Incorporated that develops, manufactures, sells and installs photovoltaic solar energy generation systems, battery energy storage products and other related products and services to residential, commercial and industrial customers.

What energy products does Tesla make?

The company's current power generation products include solar panels (manufactured by other companies for Tesla), the Tesla Solar Roof (a solar shingle system), and the Tesla Solar Inverter. The company also makes a large-scale energy storage system called the Megapack. Additionally, Tesla develops software to support its energy products.

What is a Tesla battery?

A giant battery designed to change the way we power the world—with clean energy, at an enormous scale. Tesla energy products power your home and lifestyle with clean, sustainable energy. Learn more about our residential and commercial energy products.

Is Tesla a solar company?

Additionally, Tesla develops software to support its energy products. In 2023, the company deployed solar energy systems capable of generating 223 megawatts (MW), a decrease of 36% over 2022, and deployed 14.7 gigawatt-hours (GWh) of battery energy storage products, an increase of 125% over 2022.
