

The best way to repel birds with photovoltaic panels

Overview

In the same way that houses attract humans, solar panels can attract birds like pigeons. Not all systems attract pigeons, and there's no obvious rhyme or reason to explain which systems are – or aren't – attractive. But considering there are 13.5 million pigeons and 1.3 million households with solar panels in the UK.

The solar panel is a famously sturdy option in the realm of renewable energy. It's made of tough, tempered 'safety glass', it has no moving.

You may be able to pigeon-proof your own solar panels – but it's dangerous, and you shouldn't take it on unless you're confident you can do so without damaging either yourself or your roof.

It typically costs around £500-£700 to have a standard residential solar PV system (3-4kW) pigeon proofed. Of course, the price varies depending on the exact size of the solar array, and the.

The best way to repel birds with photovoltaic panels

Protect Your Investment with the best Bird Deterrents for your ...
