

The current status of photovoltaic inverters in the Chinese market

Overview

What is the future of PV market in China?

The affections of the new policy and future PV market are analyzed. The target of energy transition of China and the role of PV are provided. PV will have more broad space in development when it comes to grid parity in the future. Need Help?

.

Which companies are leading the global PV inverter market in 2023?

Loading. Global PV inverter shipments grew by 56% to 536 GWac in 2023, with China dominating the market. Huawei and Sungrow retained their top positions, reflecting strong demand and significant growth in the solar industry.

What is the global photovoltaic (PV) inverter market size?

Representational image. Credit: Canva The global photovoltaic (PV) inverter market experienced a remarkable 56% growth in 2023, reaching 536 gigawatts of alternating current (GWac), according to Wood Mackenzie's latest report, Global Solar Inverter and Module-Level Power Electronics Market Share 2024.

Do solar photovoltaics rely on the Chinese market?

With solar photovoltaics taking over recently, an in-depth look into their supply chain shows a surprising dependency on the Chinese market from the raw materials to the assembled PVs. This article tackles the main challenges in the solar energy market and sheds light on the opportunities in that industry.

Why is PV industry growing so fast in China?

Fast growing of PV industry in China is due to series of incentive policies provided by the Chinese government, which are provided in this paper as well.

To slow down the speed of PV development, the 5.31 new policy is issued on May 31, 2018 by the Chinese government as a milestone.

Who owns the global PV inverter market?

The top 10 PV inverter vendors, led by Chinese giants Huawei and Sungrow, controlled 81% of the global market. Huawei and Sungrow alone captured over 50% of the global share, thanks largely to their popular utility-scale inverters, reports the market analyst.
