

The village is going to build a solar power station

Overview

Could a new solar farm be built in Derbyshire?

An energy firm wants to create two new solar farms spanning 328 acres between two Derbyshire villages. The sites earmarked for the farms are north of Denby and north of Smalley and sit 500m apart. Each solar farm would produce 40 megawatts (MW) of electricity.

Will a huge solar farm be built in Breckland?

People living around the site of a huge solar farm planned for Breckland have had their first chance to meet developers. The energy firm RWE wants to build panels on five sites, generating enough energy to power 363,000 homes.

How would a new power station be built?

Building the new power station would involve turning a large swathe of wood, marsh and grassland into a temporary construction site, housing a 1,000-space car and bus park and a 2,400-bed worker campus. The temporary construction site, says EDF, will eventually be returned to a natural environment.

What's going on with Amber Valley's new solar farms?

Reports assessing the environmental impact to the area have been submitted to Amber Valley Borough Council ahead of planning applications. An energy firm wants to create two new solar farms spanning 328 acres between two Derbyshire villages. The sites earmarked for the farms are north of Denby and north of Smalley and sit 500m apart.

Could a solar farm power more than 8000 homes in Essex?

A solar farm that can power more than 8,000 homes in Essex has been approved by planners. The 35-hectare (86 acres) site will be built either side of a quarry complex in the village of Danbury, near Chelmsford.

Could Botley West be the UK's largest solar farm?

That includes sources like solar — and the proposed Botley West Solar Farm, just down the road from this Oxfordshire village hall. Botley West, if built, would be the U.K.'s largest solar development, a mega farm covering 18 kilometers of countryside, with the potential to power 330,000 homes.
