

Three Gorges Power Grid Weibo

Overview

Power generation is managed by , a listed subsidiary of (CTGC), a administered by . The Three Gorges Dam is the world's largest capacity hydroelectric power station, with 34 generators: 32 main generators, each with a capacity of 700 MW, and two plant power generators, each with capacity of 50 MW, for a.

What is China's Three Gorges Project?

A part of China's Three Gorges project. /CFP The world's largest hydropower project, China's Three Gorges Hydroelectric Power Station on the Yangtze River has generated over 1,600 terawatt-hours (TWh) of clean electricity since 2003 when its first generator unit was put into operation.

How many generators does the Three Gorges Dam have?

The Three Gorges Dam is the world's largest capacity hydroelectric power station, with 34 generators: 32 main generators, each with a capacity of 700 MW, and two plant power generators, each with capacity of 50 MW, for a total of 22,500 MW.

How many kilowatts is China Three Gorges Corp generating?

The company saw its monthly generating capacity achieve a record high of 49.5 billion kWh in September, contributing 6.7 percent of the country's total power production. The installed power generation capacity of China Three Gorges Corp has reached 101 million kilowatts as of Monday, after a batch of mega new energy projects started operations.

Is China Three Gorges a hybrid power plant?

It is part of a hybrid project that includes 550 MW of wind power and 300 MW/600 MWh of battery storage. China Three Gorges has also commissioned a 200 MW PV power plant in Gansu province. The facility is part of a 700 MW hybrid project that includes 400 MW of wind power and 100 MW of CSP.

Who is Three Gorges energy?

Three Gorges Energy, a unit of China Three Gorges Corp., switched on 3.48 GW of solar in the final week of December. One of the PV facilities – located near Golmud, Qinghai province – has a capacity of 900 MW.

Why is the Three Gorges power station important?

After passing all acceptance tests, the power station was officially certified as fully completed and functioning in 2020. Besides electricity generation, the Three Gorges power station has also played a significant role in flood control, shipping and water resource utilization. The world's largest clean energy corridor, spanning 1,800 kilometers.
