

Timberline solar

Overview

What is the new timberline solar roofing system?

Solar roof technology so advanced it's simple. The NEW Timberline Solar™ roofing system from GAF Energy is based on innovations so advanced they make solar roofing simple. The solar shingles generate energy. And they go on like architectural shingles so you get powerful, reliable energy from a beautiful, cost-effective roof.

Is Timberline solar the future of solar?

With access to GAF's national contractor network, GAF Energy is uniquely positioned to bring residential solar to the mass market, transforming more roofs into solar roofs each year. "Solar roofs are the future of clean energy, and Timberline Solar is the game-changing innovation that will get us there," said Martin DeBono, president of GAF Energy.

How does Timberline solar work?

Timberline Solar™ installs like a regular roof, with only a nail gun required. It also boasts the world's first nailable solar shingle, the Timberline Solar Energy Shingle™ (ES). Lightweight, durable, and powerful, the Timberline Solar ES™ generates energy from the sun and goes down like a dream on the roofing deck.

What is a timberline solar shingle?

This new system incorporates the world's first nailable solar shingle, the Timberline Solar Energy Shingle™ (ES), which is assembled domestically at GAF Energy's manufacturing and R&D facility in San Jose, California.

How do I get Timberline solar?

If you're in the market for a roof and specifically looking for Timberline Solar, you can fill out an online form on GAF Energy's website, which will connect you with a local installer, or add you to a waitlist to be notified when

Timberline Solar becomes available in your area.

What is a GAF Timberline solar roof?

Image source: GAF Energy The GAF Timberline Solar roofing system consists of solar shingles with 45 watts of output each that are installed alongside non-solar shingles that perfectly align with their solar counterparts. The result is a roof that's built like a traditional shingle roof and also generates solar power.
