

# Total investment cost of standalone energy storage project in Argentina

Single Phase Hybrid

- 5 Year Warranty Period
- 9 Year Global Leading Inverter Brand
- Top 3 World Single Phase PV Inverter Supplier

## Overview

---

The government's estimated investment for the projects is around \$500 million USD, with a required completion timeline of 12 to 18 months. The tender will pay a fixed \$10/MW of electricity supplied and energy storage capacity bids must have a maximum cost of \$15,000/MW/month.

The government's estimated investment for the projects is around \$500 million USD, with a required completion timeline of 12 to 18 months. The tender will pay a fixed \$10/MW of electricity supplied and energy storage capacity bids must have a maximum cost of \$15,000/MW/month.

15 companies submitted 27 projects, pledging over \$1 billion in investment for a total that far exceeded the tender's 500 MW target. The Argentinian government opened the bids this week for its AlmaGBA tender process. The international tender, first announced in February, aimed to secure 500 MW of.

The total investment is estimated at US\$500m and the battery projects are due to be developed between 12 and 18 months. This tender is part of a series of measures that the government of Argentina has been developing since October 2024 with the Contingency Plan, which includes short, medium and.

This week, the Argentinian government opened bids for the AlmaGBA tender, initiated in February 2025 to procure 500 MW of battery energy storage system (BESS) capacity for critical nodes in the Buenos Aires Metropolitan Area (AMBA) grid, enhancing reliability during peak demand. Fifteen companies.

Fifteen companies submitted 27 proposals totaling 1,347 MW of storage capacity, far surpassing the government's original goal of 500 MW. The bids reflect an estimated \$1 billion in investment, a clear indicator that Argentina's energy market is ripe for transformation. At the core of this.

energy storage market in H1 2024. It is based on the prices from all the publicly announced winning bids from January 2023 to May 2024 by different districts, project of telecoms company Telstra. Another Fluence battery project

discussed this week on Energy-Storage.news is the 10MW/20MWh EStor.

Out of the fifteen companies, 27 offers were made with a total amount of 1,347 MW of storage capacity, which exceeded the initial target of the government of 500 MW. This investment estimate of \$1 billion is represented in the form of the bids, something that is a clear indication that Argentina has. Why is Argentina a good stance on energy storage?

In Argentina, the stance provides a good lesson to the European stakeholders, especially in the commercial and industrial segments of energy storage. Emerging markets can present both local and foreign players by developing tenders that are investment appropriate and clear technically and financially secured.

How much money will a battery project cost?

The total investment is estimated at US\$500m and the battery projects are due to be developed between 12 and 18 months.

Can energy storage be a reliable source of energy?

As the opportunity to build energy storage as a reliable source in grids and to decarbonize becomes critical on a global stage, the oversubscribed tender launched by Argentina demonstrates the demand for scalable and bankable C&I energy storage systems projects, as well as the efficiency of collaborating with the government in their realization.
