

Transportation requirements for lithium battery energy storage devices

Overview

What are the shipping requirements for lithium batteries?

These regulations include proper packaging, labelling, and documentation to ensure safe and secure transportation. Some general shipping requirements to transport lithium batteries internationally include: Lithium batteries weighing over 35kg must be approved by the national authority of the shipping and destination country before shipment.

What documents do you need to ship a lithium battery?

Transport Document: For lithium battery shipments, this specifies the UN number, shipping name, hazard class, packing group, and total quantity. **Pilot Notification:** For shipping lithium batteries by air, pilots must receive written information on the presence and location of lithium batteries.

How many lithium batteries can be shipped?

Only a maximum of four can be sent, with two per container, and each battery must have a rating of below 100 watts per hour. It is essential to note that some countries have their own regulations and restrictions for shipping lithium batteries, so it is crucial to check with the destination country's customs authorities before shipping.

Do lithium batteries need to be followed by the shipper?

Yes. All the applicable provisions for lithium batteries will need to be followed by the shipper of such devices, including the limitations for devices that are "active" (on) during transport. The IATA Temperature Control Regulations (TCR) also apply to such shipments. AA.

What are the DOT regulations for lithium ion batteries?

In the United States, shippers must follow the Department of Transportation's (DOT) regulations for lithium-ion batteries. This includes proper packaging, labeling and the specific quantity and type that can be transported on the

road. The trucking company must also follow the DOT regulations to put the placards on the outside containers.

How do you ship lithium ion batteries?

Goods must be labelled as “Lithium Ion Battery” or “Lithium Metal Battery” and include appropriate shipping marks and hazard labels. Lithium batteries must have the correct documentation - including a Dangerous goods declaration, air waybill, and packing list. Can you Ship Lithium-ion Batteries Internationally?
