In 1986, , representing the , invited Morris Chang to serve as the president of the (ITRI) and offered him a blank check to build Taiwan's chip industry. At that time, the Taiwanese government wanted to develop its semiconductor industry, but its high investment and high risk nature made it difficult to find investors. and turned down Chang. Only was willing to sign a joint v.

How much energy does TSMC consume in Taiwan?

TSMC accounts for roughly 5% of the energy consumption in Taiwan, even exceeding that of the capital city Taipei. This initiative was thus expected to accelerate the transformation to renewable energy in the country. [40].

How has TSMC saved energy?

In addition, we replaced inefficient components and optimized equipment

energy consumption. TSMC has carried out a total of 503 energy-saving measures spanning 8 different categories. These measures saved 300 GWh, which is equal to eliminating 160 thousand metric tons of carbon dioxide emissions, and saved NT\$750 million in utility fees.

What is TSMC doing after Taiwan's Power liberalization?

Following Taiwan's power liberalization, TSMC is expanding its use of renewable energy and participated in Taiwan's first group of energy wheeling transactions with 12 other companies in May 2020.

Why is TSMC a good company?

TSMC has made continuous improvement in energy saving and carbon reduction. All improvement experience is applied as the best available technology to reach maximum energy efficiency and reduce greenhouse gas emissions. TSMC has established intelligent management systems to control power use and reduce standby power consumption.

Who owns TSMC?

Although the central government of Taiwan is the largest individual shareholder, [10] the majority of TSMC is owned by foreign investors. [11] In 2023, the company was ranked 44th in the Forbes Global 2000. [12] Taiwan's exports of integrated circuits amounted to \$184 billion in 2022, accounted for nearly 25 percent of Taiwan's GDP.

How does TSMC reduce power consumption?

TSMC has established intelligent management systems to control power use and reduce standby power consumption. In addition, we replaced inefficient components and optimized equipment energy consumption. TSMC has carried out a total of 503 energy-saving measures spanning 8 different categories.
