### Tucson Electric solar customers to get lower grid credits

New rooftop-solar customers of Tucson Electric Power will get 10% lower credits for excess energy a landmark 2017 overhaul of the state's solar rules that ended so-called net metering,

### Tucson Electric puts huge solar, wind projects out to bid

Tucson Electric Power Co. is vetting proposals for big new renewable-energy projects, including a community-scale solar array that could power

more than 21,000 homes by 2019.

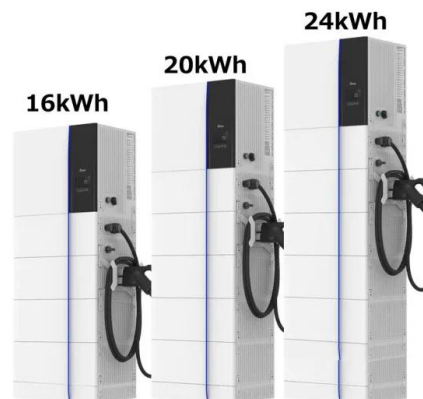

### **Tucson Electric Power: Rates, Coverage Area, Emissions**

Consumers of Tucson Electric Power can take advantage of net metering, which is a positive for both parties. Without net metering, solar panel installation is significantly less economically realistic, as citizens have no way to sell excess electricity back into the infrastructure system.

### **Hearings slated to begin in Tucson Electric Power solar rate case**

State regulators will soon decide Tucson Electric Power Co.'s solar rate case in a ruling that the Corporation Commission voted to end net metering -- the practice of crediting solar

### **Rooftop Solar**

### Local opinion: ACC, TEP should bring back net metering

Until TEP can supply Tucson's electricity from renewable sources, it should continue offering net metering to customers willing to supply their own electricity.

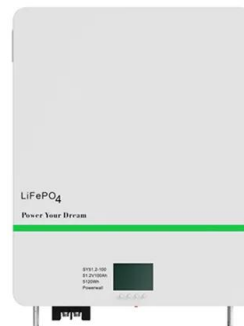

### Tucson Electric, solar groups pan rate proposal

Tucson Electric Power Co. says proposed new rates for excess energy provided by customers who install new rooftop solar systems are too high and would shortchange the company and other ratepayers.

### [TEP to Propose Revised Net Metering Plan in](#)

Tucson, Ariz. -- Tucson Electric Power (TEP) plans to file a request later this year for new 2017 rates that will include fair-market pricing for the excess energy produced by rooftop solar arrays. TEP plans to incorporate the revised net metering plan it proposed earlier this year for new users of rooftop solar power systems in that rate request.

### TEP seeks reduced net metering benefits for new home solar ...

New, Tucson Electric Power home solar customers who use net metering to save on their electric bills would get their savings cut by a \$22-a-month average under a new ...

### Arizona net-metering decision may slow solar adoption

The Arizona Corporation Commission voted on Tuesday to scrap net metering -- a process where customers are credited for excess solar-energy production at retail rates -- in favor of a lower

### What's solar worth? Inside Arizona utilities' push to reform net

Utilities and solar advocates are once again nose to nose on net energy metering in Arizona. Both Tucson Electric Power (TEP) and Arizona Public Service (APS) have proposed new ways to reimburse

### Arizona regulators to review solar power buyback rate

Future rooftop solar customers of Tucson Electric Power and other Arizona utilities could find it harder to make their panels pencil out as state regulators look to revisit what

### GoSolar Home

Energy for program participants will be generated by Raptor Ridge, a dedicated 12.5 MW solar power system built on 100 acres in southeast Tucson. The system includes more than 35,100 photovoltaic modules expected to produce about 35,800 megawatt hours every year -- enough to serve the annual electric needs of more than 2,500 homes.

### Tucson Electric Power proposes reduced net metering rate for ...
