Overview

What is a Solar Decathlon?

The Energy Department's Solar Decathlon challenges collegiate teams to design, build and operate solar-powered houses that are cost effective, ener.

What is Solar Decathlon 2022?

Solar Decathlon Turns 20! 2022 marks the 20th anniversary of the U.S. Department of Energy Solar Decathlon ®, an international collegiate competition that has helped popularize renewable energy and energy efficiency technologies, while training the clean energy workforce of tomorrow. WATCH: Solar Decathlon – Building Impact for 20 Years.

How many students participate in the Solar Decathlon?

Since 2002, more than 40,000 students worldwide have participated in the Solar Decathlon, many of whom have gone on to become architects, engineers, and researchers. The Design Challenge is a one- to two-semester design-only competition, while the Build Challenge is a two-year design-build competition.

Is the Solar Decathlon still a collegiate competition?

“As a collegiate competition, the Solar Decathlon is now as old as many of its participants!” said Kelly Speakes-Backman, Principal Deputy Assistant Secretary for the Office of Energy Efficiency and Renewable Energy (EERE).

When did the Solar Decathlon start?

The first Solar Decathlon Build Challenge was held in 2002. The Build Challenge occurred biennially in 2005, 2007, 2009, 2011, 2013, 2015, 2017, 2020 and 2023. The Race to Zero competition joined the Solar Decathlon in 2019 as the Design Challenge. The Design Challenge occurred annually in 2019, 2020, 2021, 2022, 2023 and 2024.

Can Solar Decathlon be a zero-energy building?

Solar Decathlon has pioneered energy-efficient building designs for more than two decades. Zero-energy buildings are a focus for this year's finalist teams, according to Rachel Romero, Design Challenge competition manager.
