

# **Weizhong State Grid**

## Overview

---

What is China's State Grid?

China's State Grid, one of the country's two grid operators, proposed the technology to the government in 2004 to connect the country's hydro and coal power stations with the economic hubs that gobbled electricity hundreds of miles away.

When was the State Grid Corporation of China founded?

The State Grid Corporation of China was founded on December 29, 2002, when the restructuring divided the former State Power Corporation of China into two grid companies, five generation groups and four accessorial business companies.

What percentage of China's power grid is SGCC?

SGCC accounts for 80% of the Chinese grid, with China Southern Power Grid accounting for the other 20%. :40 At its creation, SGCC company had a generation capacity of 6.47 gigawatts. In 2003 and progressively so through the early 2000s, electrical shortages caused the government to institute rolling blackouts.

Why is China's power grid creaking?

China 's creaking grid represents a major constraint to progress on its green energy transition. During the first four months of this year alone, China invested Rmb122.9bn (\$17bn) in its power grid projects, a 24.9 per cent year-on-year increase.

How much money did China invest in power grid projects?

During the first four months of this year alone, China invested Rmb122.9bn (\$17bn) in its power grid projects, a 24.9 per cent year-on-year increase. That compares with the \$3.5bn announced last October by US President Joe Biden's administration, which covers 58 projects across 44 states.

Will China build a global power grid?

The technology acts as a key component in China's proposal to build a global power grid, known as the Global Energy Interconnection. The idea – announced by China's president Xi Jinping at a United Nations summit in 2015 – is to link up national grids over the next three decades.
