

What are the pitfalls of free installation of photovoltaic panels

Overview

Cons of Free Solar Installation
You have to sign a 25-year contract
If you're not at home during the day, the savings won't be as big
You could have difficulty if you want to sell your home
Can you get free solar panels on a roof?

Companies offered to pay to lease your roof from you for 20-25 years and, in exchange, would install and maintain solar PV panels on it. You didn't have to pay upfront for the panels, and would also benefit from the free electricity produced by the system. But there are very few free solar panel schemes available now.

What are the pros and cons of getting solar panels?

Which?

members tell us the pros and cons of getting solar panels, including the challenges of choosing an installer
Which?

Team Adding solar panels to your home reduces your reliance on electricity bought from energy companies. It can reduce your electricity bills and you might even earn money by selling the excess back into the grid.

Are solar panels still a viable option?

In the same breath, with solar panels in the mainstream limelight, most negative perspectives have encouraged industry action to make changes and adaptations, so that solar panels remain a brilliant (and financially viable) option for homes everywhere.

How do free solar panel schemes work?

'Free' solar panel schemes, also known as rent-a-roof schemes, used to be commonplace a few years ago. These were run by companies eager to cash in on the feed-in tariff (FIT). This guarantees payment in return for electricity generated using renewable technologies, including solar power.

Are there free solar panels?

But there are very few free solar panel schemes available now. The Feed-in tariff scheme closed to new applicants in 2019 and has been replaced by the much-less-generous Smart Export Guarantee (SEG) scheme, making it much less attractive to businesses to offer free solar schemes. Learn about the Smart Export Guarantee scheme.

What if I signed up for free solar panels?

If you signed up for free solar panels when the FIT rate was at its highest, back in 2011, we calculated that you could miss out on as much as £23,000 for a 4kWp system. You would also have saved more than £5,000 over 25 years from the electricity produced by the panels.
