Overview

With little fanfare this week, Tesla launched its own solar inverter, getting a step closer to having a fully in-house PV system. Available now, the Tesla Solar Inverter is a stackable string inverter with two models - 3.8 kW and 7.6 kW - featuring either two or four maximum power point trackers (MPPTs). What is Tesla Solar inverter?

Learn More Tesla Solar Inverter offers improved aesthetics, reliability and native integration with the Tesla ecosystem for both Solar Roof and solar panel systems. DC power coming from solar modules is inverted to AC power by Tesla Solar Inverter for home consumption. Like Powerwall+, Powerwall 3 features an integrated solar inverter.

Why should you choose a Tesla Solar inverter?

Your Tesla Solar Inverter is designed for reliability, high efficiency and the ability to maintain it without needing installers to go on your roof. Tesla Solar Inverter has robust safety features, including integrated rapid shutdown, arc fault protection and ground fault protection, and no neutral wire allows for simple installation.

Does Tesla Solar inverter have a site controller?

For full compliance to IEEE 1547-2018 and IEEE 1547.1-2020 GW.2.0 or SMC shall be used with Solar Inverter.
