Overview

The Smart-UPS is a series of enterprise-level uninterruptible power supplies (UPS) made by American Power Conversion (APC). Most of the units have a SmartSlot (with the exception of SC and SMC series) which accepts an optional interface card providing features ranging from network connectivity to temperature.

- All Smart-UPS units work with APC's proprietary software which is available for a variety of operating systems.
- A free.

As a way to provide UPS management, monitoring and automatic shutdown of attached equipment, all Smart-UPS models include at least.

- APC White Paper #79, by Jeffrey Samstad and Michael Hoff .
- • .

APC by Schneider Electric (formerly American Power Conversion Corporation) is a manufacturer of , electronics peripherals, and data center products. In 2007, acquired APC and combined it with MGE UPS Systems to form Schneider Electric's Critical Power & Cooling Services Busine.
