Solar tiles are a relatively new technology which takes thin film solar PV and makes it into individual roof tiles. These are installed in the place of regular roof tiles and can offer an aesthetically pleasing alternative for those who.

On-roof solar panels make up the most widely recognisable solar roofing system in the UK. The system is made up of individual panels mounted.

Once you have chosen your preferred type of solar roofing system, you will have to consider whether you want that system tied to the National Grid or whether you want a hybrid system. A grid-tied system does not include battery.

An in-roof solar system offers the exact opposite. In this system, the panels are installed as part of the roof with the panels mounted on the roof battens in place of tiles. This allows them to sit flush and blend in seamlessly with.
