

# Where can I find a solar photovoltaic power generation sandbox

## Overview

---

What is sandbox solar's "spade" tool?

Sandbox Solar, a solar contractor, has been developing such a tool, called Spade. Spade aims to help solar developers to determine the best crop types and solar panel layouts for their projects. The tool made it into the fifth and final round of the Department of Energy's "American Made" solar innovation program.

How do virtual power plants work?

This regulatory explainer concerns virtual power plants and how these operate under current regulations. What is a Virtual Power Plant?

A virtual power plant (VPP) is a collection of power-generating units spread over different parts of the same energy grid, connected by a central software platform to collectively make up a larger power plant.

What is a virtual power plant (VPP)?

A virtual power plant (VPP) is a collection of power-generating units spread over different parts of the same energy grid, connected by a central software platform to collectively make up a larger power plant. VPPs can be made up of combined heat and power assets, renewable generation through wind and solar farms, as well as battery storage.
