

Where to read the anti-counterfeiting code of LONGi photovoltaic panels

Overview

The product barcode is a string of numbers on the front or back of the module as shown in the figure. How can clients verify the authenticity of Longi modules?

Clients are able to verify the authenticity of LONGi modules and check product documentation by simply scanning QR codes and the system also allows post-sales requirements to be handled more efficiently.

What if a Longi PV module is broken?

To inform the LONGi customer service personnel within two weeks when modules are found broken or other significant abnormality. Refer to the [LONGi PV Module Operation and Maintenance Manual](#) for details on module maintenance.

How to calculate VOC in a Longi module?

(LONGi modules maximum system voltage is DC1000V/DC1500V---actually system voltage is designed based on the selected module and inverter model.) The correction value of VOC can be calculated by the following formula. $C_{Voc} = 1 - \beta V_{oc} \times (25 - T)$ T: The expected lowest temperature of the installation site.

What is the application level of LONGi Solar module?

The application level of LONGi Solar module is Class II, which can be used in systems operating at > 50 V DC or >240 W, where general contact access is anticipated; When the modules are for rooftop application, it is necessary to take the overall fire rating of the finished structure as well as operation and maintenance into account.

What happens if a PV module reaches 30 volts?

Any contact of 30 V or larger DC Voltage can be fatal. In case of no connected load or external circuits, modules can still produce voltage. Please use

insulation tools and wear rubber gloves when operating modules in the sunlight. No switch is on the PV modules.

What is the maximum system voltage for Longi modules?

(LONGi modules maximum system voltage is DC1000 V/DC1500 V---actually system voltage is designed based on the selected module and inverter model)
The correction value of VOC can be calculated by the following formula. T: The expected lowest temperature of the installation site.

Home Energy Storage (Stackable system)

High Efficiency

Easy installation

Safe and Reliable

Perfect Compatibility

Product Introduction

- Scalable from 10 kWh to 50 kWh
- Self-Consumption Optimizer
- Integrated with inverter to avoid the compatibility problem
- LFP battery, safest and long cycle life
- Stackable design for easy installation
- Capable of High-Powered Emergency-Backup and Off-Grid Function
