

Where to sell photovoltaic solar panels

Overview

You need to have a renewable electricity generating system that meets the SEG eligibility requirements. You must have a meter capable of providing half-hourly export readings. This would typically be a smart meter. Speak to your energy supplier about getting a smart meter installed if you do not already have one.

You need to apply directly to a SEG tariff supplier to get paid. The OFGEM website lists the energy suppliers that provide SEG tariffs. Your SEGtariff.

Use the Energy Saving Trust calculator to estimate: 1. how much you could save from solar panels or other renewable electricity generating.

Where to sell solar panels

1. Door-to-door Going door-to-door is a great place to start selling solar — even though it might sound a bit old-fashioned at first. Take Vivint, the home security company, for example.
2. Targeted online communities .
3. Local Google and Facebook Ads .
4. Facebook groups for homeowners .
5. Customer referrals .

Can you sell solar energy back to the National Grid?

Householders and businesses with solar panels installed, who generate more renewable electricity than they need, can sell energy back to the National Grid under the Smart Export Guarantee (SEG). An increasing number of people are now benefiting from this government-backed initiative, and you could be one of them.

Can you get money from solar panels?

As a homeowner with solar panels, you may be able to receive payments for any excess solar energy you send back into the grid. Since 2019, the government have backed various schemes to help those who produce renewable energy, to benefit from sending their surplus into the national energy supply.

How do I sell excess electricity generated by my solar PV system?

To sell excess electricity generated by your solar PV system, you need to apply directly to a licensed SEG tariff supplier. Your SEG licensee doesn't have

to be your current top-up electricity supplier. You can choose different companies for SEG payments, electricity supply, and gas supply.

Can you sell solar power in the UK?

This method of selling solar power was introduced by the UK Government in 2010 to promote the uptake of renewable energy. Homeowners and business owners who installed renewable technology could get paid for all the energy generated if they were registered with a provider under the scheme, whether used by them or not.

Can you sell solar energy through SEG?

No, at the moment, the only option for homeowners is to sell excess solar energy back to the grid or store it using battery storage for future use. Are there special requirements to sell energy through SEG?

Yes, The SEG requires your solar panels to be under 5MW capacity and you must have an MSC certificate for installation.

How can a home owner make money from selling solar energy?

Earn money: Homeowners can earn money by selling back electricity to the grid in the UK through programs like the Smart Export Guarantee (SEG).
Reduced carbon emissions: Selling excess solar energy back to the grid can help reduce the need for fossil fuels and decrease carbon emissions.
