Why do solar companies use automatic framing machines?

Frankly speaking that top solar companies are now using automatic framing machines to reduce the labor cost so as to make their solar panel's price more competitive. Solar panel framing refers to the process of attaching protective and strengthening frames to the PV laminates of a solar panel.

What is solar panel framing process?

solar panel framing process, carried out by specialized framing machines, is a vital step that provides structural support, protection, and mounting functionality to solar panels. Prepare and debug the aluminum frame according to the size of the solar panel components. Install the aluminum frame on the spreading machine for automatic gluing.

Why are solar panel framing machines important?

Solar panel framing machines are very important in the process of making solar panels. They help connect different parts of the production process together. The machine that makes the frames for solar panels needs to work well with the other machines before and after it.

How to choose a solar panel framing machine?

The framing machine needs to match the production goals and volumes of the solar panel factory. Choosing a machine with the right speed, cycle time, and output can help avoid problems, make things run smoothly, and reach production targets. 2. Automation and Precision.

What makes a solar panel a good choice?

Solar panel design focuses on using solar cells to turn sunlight into power. The efficiency of solar panels plays a big role here. This efficiency is mainly affected by the solar PV cell technology chosen. Monocrystalline panels do better than polycrystalline ones because they use purer silicon.

## How to install solar panels with aluminum frame?

Prepare and debug the aluminum frame according to the size of the solar panel components. Install the aluminum frame on the spreading machine for automatic gluing. Place the solar cell strings or glass on the frame, ensuring proper alignment. The glass should be facing downwards. Activate the framing machine.
