Find out what owners think of JA Solar, Jinko Solar, Longi, Solaredge and Trina Solar solar pv panels to find the best solar panel brand for you.

Are solar panels a good investment?

Solar panel owners we've spoken to have had some quite different motivations: Wanting to charge their electric vehicle from solar panel electricity so that it's guaranteed 'green energy'. A long-term investment that's future-proofing against electricity price rises. Trying to reduce their carbon footprint and do their bit for the environment.

Which type of solar panels are most efficient?

Monocrystalline solar panels are the most efficient type of solar panel currently on the market. The top monocrystalline panels now all come with 22% efficiency or higher, and manufacturers are continually raising this bar.

What makes a good solar panel system?

The quality of the installation and other equipment (such as the inverter) also contribute to how good the solar panel system is overall. Price also varies depending on the solar panel brand and installer. The Which?

members we surveyed owned solar PV panels from more than 20 different brands.

How do I choose the best solar panels?

For example, solar panels with the highest power ratings are ideal for large households, while more efficient panels are a better choice for small roofs and homes that don't get much sunlight. We'll offer more guidance on choosing the best solar panels for you in our buyers' guide, below.

What is the best type of solar panel?

The best type of solar panel is monocrystalline. They're more efficient than any other panel currently on the market, meaning you'll be making the best use of your roof space. And they have longer lifespans than all their competitors, which boosts their return on investment beyond that of polycrystalline panels or solar tiles.
