Key takeaways SunPower, REC, Panasonic, Maxeon, and Jinko Solar offer the best solar panels. The type of solar panel, power output, efficiency, performance in warm climates, warranty, and price are the key factors to assess when comparing solar panels. The best solar panel for your home can depend on your roof space, shading, and climate. How do I choose the best solar panels?

You'll also want to choose panels from a company that backs its panels (and ideally your entire system) with a strong warranty. We reviewed hundreds of solar panel models and found that five brands stand out: SunPower, REC, Panasonic, Maxeon, and Jinko Solar. SunPower, REC, Panasonic, Maxeon, and Jinko Solar offer the best solar panels.

Which solar panel is best?

Qcells: Best overall solar panel Qcells is one of the most popular names in residential solar, thanks to quality equipment and great pricing. SolarReviews research shows that 66% of solar installers now offer Qcells panels, so there's a good chance you could run into a quote for them.

How efficient are solar panels?

The most efficient solar cell of any kind has an efficiency of 39.5%, but is designed for space applications, not an ordinary roof. Residential solar panels typically range between 15% and 20%, with the industry-leading panels pushing 23%. If solar panel efficiency is your top concern, here are the best panels to look out for:

Which solar panels have the most power?

SunPower's M-Series 440 W solar panels offer the most power at 21.2 watts (W) per square foot. They're highly efficient and come with a great warranty, which covers your entire system (the panels, inverters, and racking equipment). The biggest downside of SunPower panels is the price.

Are Panasonic solar panels good?

Panasonic solar panels come in sizes up to 410 watts and have efficiency ratings up to 22.2%. All of Panasonic's solar panels come with a 25-year production warranty that says the panels won't fall below 92% of their rated capacity. That mark matches REC and SunPower, but beats every other panel we looked at.

What are the different types of solar panels?

There are mainly four different types of solar panels to consider.

Monocrystalline panels, which are black, are considered the most efficient type of panel. As a result, you'll need less panels to generate as much electricity as other types, Alam says. "These are considered the Rolls Royce of solar panels," he adds.
