

Why do photovoltaic panels need to be cleaned

Overview

Do solar PV panels need to be cleaned?

That said, most solar pv panels in the UK will not need any heavy-duty cleaning because regular rain will wash most dirt and grime off the surface, dispelling one of the myths about solar being its difficulty to clean.

What is solar panel cleaning?

First and foremost, let us introduce the two different terms discussed in this article: Solar panel cleaning: this entails washing the panels like windows. The cleaning may be combined with preventive maintenance of the solar collectors.

Why do solar panels need to be cleaned?

Properly maintained panels can generate 3.5% more energy, while uncleaned panels may lose up to 30% of their efficiency. Dust isn't the only culprit; leaves can also hinder sunlight, affecting panel performance. Solar systems in dust-prone areas, such as near roads or farms, demand more frequent cleaning.

Should you clean your solar panels regularly?

The experts at Solar Panel Cleaning Ltd explain that if you don't regularly clean your solar panels dust can accumulate and even just one dusty cell can affect the performance of the entire panel.

How to clean a solar panel?

Many cleaning products are too abrasive for solar panels or may leave a residue that blocks sunlight, so you should choose these carefully. Try mixing a mild detergent in water, slowly adding more cleaner if you need more cleaning power. The last step in solar panel cleaning is to dry the glass and review your work.

Should you hire a solar panel cleaning company?

There are a myriad of companies which offer cleaning services for each of these solar panels. Enlisting the aid of a solar panel cleaning company is a reasonable choice for very large installations known as solar farms or solar parks. Why is that?
