Overview

Can wind power achieve grid parity?

In addition, experiences and boundary conditions of pilot projects can be summed up and promoted to achieve wind power grid parity on a larger scale. In the scenario visualized by the 13 th Five - Year Plan for Renewable Energy Development, by 2020, wind power will achieve grid parity with coal-fired power.

How to conduct grid parity analysis of onshore wind generation?

The model framework is shown in Fig. 2.

Can wind power achieve grid parity with coal-fired power?

In the scenario visualized by the 13 th Five - Year Plan for Renewable Energy Development, by 2020, wind power will achieve grid parity with coal-fired power. The key to achieving this goal is to set boundary conditions and improve the policy framework for grid parity of wind power. Advancing the pilot projects is a good start.
