

# **Why don't factories install photovoltaic panels on their roofs**

## Overview

---

Can solar panels be installed on a factory roof?

The roofs of factories are often the ideal place to install solar panels. As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it.

Can solar PV be installed on warehouse roofs?

Installing solar PV on warehouse roofs means generating free electricity for the warehouse and adjacent buildings, such as offices. Warehouse and logistics firms can significantly reduce their energy bills with a solar PV system.

Are factory buildings a good case for commercial solar energy?

Factory buildings are an excellent case for commercial solar energy because of their roof type and size. Most big commercial structures have roofs with sufficient space, making factories and industrial plants contextually ideal for solar panel installation.

Can solar panels be installed on a commercial building?

By simply installing Solar PV panels, you can utilise your roof space on your commercial premises (eg. agricultural buildings, factories, warehouses, hospitals, schools etc) to generate electricity that is free to be used on site.  
How Much Roof Space Do I Need For PV Panels?

Minimum Requirements for a Good Return on your PV Installation.

Can SMEs install solar panels on warehouse roofs?

Based on this, the general consensus is that SMEs can consider installing solar pv panels on their warehouse roofs, despite typical UK weather conditions. The primary benefit of a solar PV panel installation for an SME, the reduction

in your energy bill and carbon emissions will depend on how much of your energy you generate with solar panels.

Do solar PV panels work?

This isn't the case. Solar pv panels work best when solar energy is measured at an average of 1000 watts per metre of Earth surface squared ( $1000\text{w}/\text{m}^2$ ). Hours during the day when the Earth receives this level of solar energy are called peak sun-hours.

## Why don't factories install photovoltaic panels on their roofs
