

# You can install photovoltaic panels on your own fields

## Product Model

HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

## Dimensions

1600\*1280\*2200mm  
1600\*1200\*2000mm

## Rated Battery Capacity

215KWH/115KWH

## Battery Cooling Method

Air Cooled/Liquid Cooled

## Overview

---

Can I install my own solar panels?

Yes, you can install your own solar panels. Sunstore Solar can provide professional installation, but we appreciate some people like to get stuck into a project. We designed our solar panel kits specifically for DIY solar panel installation projects. And what better project than providing energy security for your family or business?

.

Where should a solar farm be built?

Solar farms are normally built on rural land. There needs to be careful thought given as to the suitability of the land chosen for a solar farm. The prime spots for solar farms are either on flat land or on a south facing slope. Ground mounted solar panel systems of greater than 9m sq. (4-5 large solar panels) require planning permission.

Are solar panels for farms a good investment?

Geo Green Power specializes in large-scale solar panel systems for farms and agriculture. There are significant financial returns to be achieved by generating and using your own electricity with solar farms. Interested in the benefits and costs of solar panels for farms?

.

How do I choose a solar farm site?

For prospective solar farm developers, once you've found your ideal site, there are other things to consider: access, site layout, design and appearance. Security, too, as solar facilities do contain high-value equipment that has to be protected with fencing, CCTV and lighting. Solar Farm Costs.

How much land do you need for a solar panel farm?

The first thing you'll need when setting up a solar energy project is somewhere for it to go. And when you're looking for land, know that solar panel farms need quite a lot of it (compared to other forms of power generation) - for a 1MW farm, you'll likely need 5 - 8 acres. Keep in mind that you won't just need space for the panels themselves.

Can solar panels be installed on a farm building?

Solar panels can be installed on farm building roofs with a 10-15° roof pitch, which generates substantial amounts of power even when the roof is not necessarily facing south. This installation does not require planning permission and maintenance and servicing costs for PV installations are low.
